

## G2-M2-Topic D

G2-M2-L8: This lesson can be omitted. Consider using some problems from the Problem Set as future application problems.

G2-M2-L9: If needing more time to get through the concept development, project the application problem along with both model drawings. Pose the question “Which diagram do you prefer & why?”

G2-M2-L10: Consider not teaching this lesson explicitly, but instead weaving in its word problems over the next several lessons during the Application Problem section.
