

G3-M1-Topic B

G3-M1-L4: For the Application Problem, show one more model drawing method – a tape diagram with 3 units of 5.

G3-M1-L5: Application Problem Alternative: Project the word problem and the given graphic, but include a second graphic that shows 18 divided into groups of 3. Which drawing accurately represents Stacey's bracelets? Why? This reinforces conceptualization of the two ways to divide.

G3-M1-L6: Application Problem Alternative: Project the word problem and the given graphic, but include a second graphic that shows 20 divided into 5 equal groups. Which drawing accurately represents the players on each team? Why? This reinforces conceptualization of the two ways to divide.
