G5-M1-Topic F

G5-M1-L13: Subset to be completed before the problem set:

3 x 4 =
3 groups of 4 ones is ___ ones
12 ÷ 3 =
2 x 3 =
2 groups of 3 tenths is ___ tenths
0.6 ÷ 2 =

G5-M1-L14: Subset for struggling students might include the following problems:

- $0 6.482 \div 2 = 0$ $0 9.396 \div 3 = 0$ $0 8.448 \div 4 = 0$
- G5-M1-L15: Consider selecting a different application problem. The lesson content is challenging and if too much challenge is layered on top of one another, students might find the class period grueling.

G5-M1-L16: Use this Lesson/Problem Set as extension for students who have first mastered the skills of lessons 13-15.
