

G5-M3-Topic B

G5-M3-L3: Consider bridging this important lesson over two days.

G5-M3-L4: As a lead-in to the Problem Set, consider providing students with a subset of problems that are analogous to #1 of Problem Set 3.

G5-M3-L5: This lesson could be switched with Lesson 4, because adding & subtracting fractions with sums & differences less than 1 use the same models.

G5-M3-L6: As a lead-in to the Problem Set, consider providing students with a subset of problems that are analogous to #1 of Problem Set 5.

G5-M3-L7: If many students are struggling with Lesson 3-6 content, consider using this Problem Set as extension work for those who have mastered it.
